

2300B Air Adjusted Coupling

OPERATION WITH
OR WITHOUT AIR SER-
VICE CHAMBER

Similar to our 2300, the 2300B offers a bottom mount air chamber design for installations where rear clearance is a problem. Like all our 2000 series, our 2300B is also made from Premalloy for long life. All 2000 series couplings can be operated with or without an air service chamber.

IMPORTANT GUIDELINES that apply to all Premier Air Adjusted Couplings

- Do not weld on any coupling assembly
- Always use Grade-8 fasteners properly torqued
- Do not apply lubricants to the coupling hook
- Air service chamber must be Type-24 or Type-30 with 90-120 PSI air supply
- Clean & inspect coupling for damage & excessive wear prior to each and every use
- Lubricate all coupling components at a minimum of 90 day intervals
- Do not bind-up (Jackknife) any application as stresses can cause damage to products or components, resulting in failure and detachment of the trailer while in use
